PREFACE

The State Accrediting Agency for Veterans Training was created by executive order pursuant to instructions contained in the original G.I. Bill. This agency is responsible for approving courses of education and training in the State of Oklahoma under the provisions of Chapter 36, Title 38, U. S. Code.

A program or course offered by a school or training facility in this state other than an installation of the federal government, must be approved by this agency before an eligible veteran; service person; war orphan, dependent, or widow of a totally disabled veteran can receive educational benefits.

The schools and training facilities in this directory have been categorized by the types of programs they offer. The directory includes all schools and programs that are currently approved for veterans training. New schools, new courses and programs are continually being added to or deleted from our list.

The State Accrediting Agency for Veterans Training does not recommend or endorse any particular school or educational training program. The acknowledgment of a school or training establishment in this listing indicates only that the schools and training establishments have been found to be in compliance with the minimum standards and regulations for the type of school concerned.

Individuals interested in determination of eligibility under Chapter 30, 32 and 35, Title 38 or Chapter 1606 and 1607, Title 10, U.S. Code, should contact the United States Department of Veterans Affairs Regional Office well in advance of any contemplated enrollment.
