

Mission

The Department of Environmental Quality's Brownfields section provides a means for private parties, non-profits, and public entities to voluntarily investigate and if warranted, clean up properties that may be contaminated with hazardous wastes. The formal Brownfields Program provides specific state liability relief and protects the property from Federal Superfund actions. The Brownfields section provides Targeted Brownfield Assessments to public and nonprofit groups at no cost. Grants for assessment and cleanup are also available to non-profits and government entities.
