

# The state's Web-based career guidance system.

## What is OKCIS?

OKCIS is an online system of career development information and activities that sets students and adults on the road to planning.

Administrators, counselors, educators, teachers, students, adults and parents have current, complete and comprehensive resources essential for career development. OKCIS has a Junior option,

which is written on a fifth-grade level, making it ideal for elementary and middle grades, special populations, and environments in which refresher or inception career exploration is key. The OKCIS standard version is written on an eighth-grade level and offers an array of career planning and job placement information.

Designed for all ages, fifth-grade to adult, and provides an array of career information at your fingertips.

## How do I use OKCIS?

*Training is offered across Oklahoma year-round. This training covers how to navigate the system and implement it with your users. Free resources are also available upon request. View our training calendar and register at [okcis.org](http://okcis.org) under the "Calendar" link or email [okcis@okcareertech.org](mailto:okcis@okcareertech.org) for more information.*
