

List of Figures

1. Map of the geologic provinces of south-central Oklahoma	1
2. Structural features in the field-trip area in the vicinity of Ardmore, Oklahoma	3
3. Generalized stratigraphic column showing the Springer Group and the Dornick Hills Group	3
4. Quartz-feldspar-rock diagram showing the composition of lower Morrowan and Springer sandstones ...	5
5. Exposure of sandstone on the north side of State Highway 77S (Stop 1)	8
6. Graphic columnar section of rocks exposed along State Highway 77S (Stop 1)	9
7. Graphic columnar section of rocks exposed at the spillway for City Lake dam (Stop 2)	10
8. Unnamed shale in the Springer Formation below the spillway for City Lake dam (Stop 2)	11
9. Contact between the lowermost unnamed shale unit of the Springer Formation and base of the Overbrook Sandstone Member at the eroded spillway of City Lake dam (Stop 2)	11
10. Displaced slab of the Overbrook Sandstone showing an abundance of trace fossils in Unit 2 (Stop 2)	12
11. Close-up view of interbedded sandstones, siltstones, and shales in Unit 2 (Stop 2)	12
12. Sandstone beds of Unit 3 (Stop 2)	12
13. Surface GR profile of the Overbrook Sandstone Member and subsurface well logs from the Samson Resources No. 1 Patzkowski well (Stop 2)	13
14. Graphic columnar section of rocks exposed along tributary creek of Cool Creek (Stop 3)	14
15. Sandstone of the Primrose Member of the Golf Course Formation (Stop 3)	15
16. Sandstone beds of the Primrose Member of the Golf Course Formation (Stop 3)	15
17. Lake Ardmore Sandstone Member of the Springer Formation (Stop 3)	16
18. Uppermost bed of sandstone in the Primrose Member of the Golf Course Formation (Stop 3)	17
19. Graphic columnar section of rocks exposed in vicinity of the ranch pond (Stop 4)	18
20. Oldest exposed sandstone of the Rod Club Sandstone Member (Stop 4)	18
21. Uppermost sandstone of the Rod Club Sandstone Member (Stop 4)	19
22. Lower part of the lowest unnamed shale member of the Springer Formation (Stop 4)	19
23. Graphic columnar section of rocks exposed on the southwest flank of the Caddo anticline (Stop 5)	20
24. Tabular sandstone beds of the Rod Club Sandstone Member exposed on the Caddo anticline (Stop 5) ..	21
25. A tabular bed of the Rod Club Sandstone Member exposed on the Caddo anticline (Stop 5)	21
26. Imprints of wood fragments in sandstone of the Rod Club Sandstone Member (Stop 5)	22
27. Surface GR profile of the Rod Club Sandstone Member and subsurface well logs from the Samson Resources No. 1 Patzkowski well (Stop 5)	22
28. Graphic columnar section of rocks exposed beside the driveway to MGM Ranch (Stop 6A)	23
29. Lake Ardmore Sandstone Member exposed north of the MGM Ranch driveway (Stop 6A)	24
30. Cast of fossil wood fragment in the Lake Ardmore Sandstone Member (Stop 6A)	24
31. Boxwork concretionary structures exposed on Unit 2 of the Lake Ardmore Sandstone (Stop 6A)	24
32. Cross-section of the Lake Ardmore Sandstone exposed beside the driveway to MGM Ranch (Stop 6A) ...	25
33. Surface GR profile of the Lake Ardmore Sandstone Member and subsurface well logs from the Samson Resources No. 1 Patzkowski well (Stop 6A)	25
34. Graphic columnar section of rocks exposed at the MGM Ranch headquarters (Stop 6B)	26
35. Outcrop of the lower unit of the Overbrook Sandstone Member (Stop 6B)	27
36. Close-up view of the sandstone shown in Figure 35 (Stop 6B)	27
37. Steeply dipping beds of the Overbrook Member form a “wall” below dam at Scott King Lake (Stop 6B) ..	28
38. Interference ripple marks and trace fossils on the surface of Unit 4 (Stop 6B)	28
39. Cross-section of high-angle cross-bedding at the exposure of the Overbrook Sandstone (Stop 6B)	28
40. Surface GR profile of the Overbrook Sandstone Member and subsurface well logs from the Samson Resources No. 1 Patzkowski well (Stop 6B)	29
